

Rashad Ataf

Full Stack Software Developer at [ZIM Connections](#)

Innovative Full Stack Software Developer with over 7 years of experience specializing in the MERN stack, with a proven track record in implementing scalable solutions and leading technical innovation. Skilled in driving project success by pioneering design decisions, optimizing application performance, and collaborating closely with UI/UX designers to enhance user interfaces.

WORK EXPERIENCE

ZIM Connections, London — Full Stack Software Developer

DEC 2021 - PRESENT

- Spearheaded the development of a full-stack mobile app, optimizing data processing and visualization in JavaScript (React Native, Node.js, MongoDB).
- Implemented 20+ features, reducing load time by 75% and enhancing user experience.
- Resolved 50+ bugs, fortifying security and stability.
- Collaborated with the marketing team to introduce new features, boosting user engagement.
- Conducted research on cutting-edge technologies for application enhancement.
- Collaborated with UI/UX designers to develop a comprehensive design system in Figma, successfully standardizing visual elements across the application to ensure a cohesive user experience.

Alphatech, Istanbul — Full Stack Software Developer

FEB 2021 - NOV 2021

- Engineered role-based dashboards, tailoring user permissions and enhancing user experience.
- Conducted in-depth analysis of application requirements, crafting efficient and scalable database designs.
- Explored and implemented best practices in HTTP standards, REST, and web security for optimal application performance and user authentication.

Freelancer, Full Stack Software Developer

AUG 2017 - FEB 2021

- Executed comprehensive redesigns for websites, enhancing navigation, aesthetics, and search engine rankings.
- Integrated apps with REST APIs for Google Maps, social media logins, payment processors, and various services.
- Conducted thorough searches for suitable hosting and VPS, deploying projects and configuring servers with domains and subdomains.
- Engineered RESTful web services to manipulate dynamic datasets.
- Designed and implemented both NoSQL and SQL databases, developing APIs for seamless database communication.
- Leveraged programming expertise in Node.js, PHP, SQL, JavaScript, and other technologies as required.
- Crafted site layouts and user interfaces using HTML and CSS best practices.

EDUCATION

Tishreen University, Bachelor in Computer Engineering.

EU Blue Card-eligible university & degree.

SEP 2012 - SEP 2019
